

Scales

Look at the scales below. What is the reading where each letter falls?

Jack collects cans. The chart below shows the number of kilograms of cans he collected on each day for one week.

1. How many kilograms of cans did Jack collect on each day of the week?
2. What is the total number of kilograms of cans that Jack collected?
3. What is the difference between the number of cans he collected on Monday and the number of cans he collected on Thursday?
4. What is the difference between the number of cans he collected on Saturday and the number of cans he collected on Friday?
5. If Jack got paid £2 per kilogram of cans that he collected, how much money would he be paid for this particular week's collection?
