What has happened?

Black Hall is a den of criminality. There are lots of people there who have reason to kill Dr Black. There are three males and two females. So when Dr Black turns up dead, you are assigned to the case. You have to decide who has a motive? What means of murder might they have used and howl they planned to get away?

To help you, there are a series of clues which you must solve.

1. Col. Mustard, who never carries a gun, sometimes wears a blue baseball cap. The man in the sports car needed money to pay off some gambling debts. The person with the green hat had a matching speedboat.

2. It is assumed that if the Reverend had killed Black, it would be by using one of the two alter candle stick holders to commit a crime in a jealous rage. After the crime had been committed, the rope was found hanging in the conservatory.
3. The thief planned her getaway in a microlite wearing a brown flying helmet. Miss Scarlet was an avid reader and planned to commit the crime in the library. Dr Black was not trying to blackmail any of his male guests.
4. Professor Plum was in the lounge when Doctor Black's murder took place. Rev. Green's grey hat was found on the front seat of his car. Col. Mustard arrived at the mansion in his own private helicopter.
5. Miss Scarlett, who was prepared to hit Dr Black with some lead pipe, was not the thief. Neither Mrs White nor the person with the sports car liked the idea of stabbing someone. One of the pilots was in the conservatory when the crime was committed. However, there was a dagger found in the hall.
6. The person in the bedroom had a grey hat. The person with the green hat left it lying about in the library.
